

BIDENS PLANT NAMED 'SUNBIDESUPA'

5

ABSTRACT OF THE DISCLOSURE

Disclosed herein is a new and distinct variety of
10 *Bidens ferulifolia*, named 'Sunbidesupa' having a very
compact and mounding growth habit with dense yellow green
foliage. The Bidens variety has freely branching, stiff
stems and very short internodes. It appears dense and
busy yellow green foliage, having large, vivid-yellow
15 inflorescences, commonly 8 ray florets in a whorl per
inflorescence, on the short peduncles. The plant exhibits
good resistance to heat, cold, disease and pests.
